290.624 Package labels; contents; allowable variations.

Sec. 24. Except as otherwise provided in this act, any commodity in package form kept for the purpose of sale, or offered or exposed for sale, shall bear on the outside of the package such definite, plain, legible and conspicuous declarations of (1) the identity of the commodity in the package unless the same can easily be identified through the wrapper or container, (2) the net quantity of the contents in terms of weight, measure or count, but the term “when packed” or any words of similar import, or any term qualifying a unit of weight, measure or count, such as “jumbo”, “giant”, “full” or the like, that tend to exaggerate the amount of commodity in a package, shall not be used, and (3) the name and place of business of the manufacturer, packer or distributor in the case of any package kept, offered or exposed for sale, or sold any place other than on the premises where packed as may be prescribed by regulation promulgated by the director. The director shall, by regulation, establish reasonable variations to be allowed, which may include variations below the declared weight or measure caused by ordinary and customary exposure to conditions that normally occur in good distribution practice and that unavoidably result in decreased weight or measure. Such regulations shall provide for exemptions for small packages and for commodities put up in variable weights or sizes for sale intact and either customarily not sold as individual units or customarily weighed or measured at time of sale to the consumer.

History: 1964, Act 283, Eff. Aug. 28, 1964.

290.627 Packages; advertisement, declaration of quantity.

Sec. 27. Whenever a commodity in package form is advertised in any manner and the retail price of the package is stated in the advertisement, there shall be closely and conspicuously associated with such statement of price a declaration of the basic quantity of contents of the package as is required by law or regulation to appear on the package, except that this section shall not apply to products for agricultural or horticultural use where the custom is to state the number of objects or amount of area which can be treated per package unit and the number or area is so stated. Where the law or regulation requires the declaration of net quantity to appear on the package in terms of more than 1 unit of weight or measure, only the smallest unit of weight or measure need be stated in the advertisement. In connection with the declaration the qualifying term “when packaged” or any other words of similar import, or any term qualifying a unit of weight, measure or count, for example, “jumbo”, “giant”, “full” and the like that tends to exaggerate the amount of commodity in the package, shall not be used.

The requirements of this subsection apply only to tanks of 100 pounds or less.

(2) The packaging and labeling requirements for commodities sold in Michigan shall conform to the "uniform packaging and labeling regulation" published in the 2012 edition of the NIST handbook 130, which is incorporated by reference, except for section 13 of that publication or except as otherwise modified by rule.

Sec. 28d. (1) Notwithstanding any requirements adopted under section 28c, the gross weight of a vehicle shall be determined by weighing the vehicle in a single measurement for a vehicle that is not a tractor-trailer combination and not by adding the results of multiple measurements taken at opposite ends of the vehicle. The gross weight of any tractor-trailer combination shall be determined by the method described in subsection (2).

(2) The gross weight combination of a truck tractor with multiple trailers shall be determined without uncoupling and by using a method of split weighing and combining the measurements, if necessary, if the following conditions are met:

(b) There shall be no tension on the draw bar.

(c) The approaches to the scale shall be straight and on the same level as the scale.

(d) The approaches to the scale shall be of sufficient width and length to ensure level positioning of the coupled vehicles during weighing.

(3) A scale used to weigh vehicles under subsection (2) shall be tested at least annually or upon repair or maintenance of the weights and measures device, by weighing a coupled tractor with multiple trailers as a single unit and comparing that weight with the combined weight of each vehicle weighed separately. If the weights determined by this method vary by more than 0.2%, the scale shall not be used to determine the gross weight of vehicles while they are coupled until the scales are corrected to properly measure within the 0.2% range. All testing data shall be recorded and the records retained on site by the owner or operator and made available to the department for review upon request.

(4) If a scale cannot be used to weigh vehicles under subsection (2) while they are coupled, the vehicles shall be weighed individually and the weights totaled to obtain the gross weight of the vehicle combination.

(5) This section does not apply to the enforcement of vehicle weight under the Michigan vehicle code, 1949 PA 300, MCL 257.1 to 257.923.
