The allotment shall take effect immediately. Should the arbitrators be unable to agree, they shall adjourn the hearing, and on the adjourned day associate with themselves a county road commissioner of another immediately adjoining county. Should the 2 arbitrators be unable to agree on the third arbitrator, on notification of the state highway commission by the county road commission to which application for redivision has been made that they are unable to agree on the third arbitrator, the state highway commission shall appoint a third disinterested party, and the 3 shall determine the questions by majority vote. When a line road or bridge has been laid out or established, and the county road commissions refuse or neglect to construct or maintain their designated portion of the road in a manner reasonably safe and fit for public travel, the state highway commission, on a petition of 7 property owners of either county, shall inspect the merits of the petition. If the state highway commission decides with the petitioners, the state highway commission shall direct the county road commission to which the road or bridge belongs to construct and maintain the road or bridge, and in default shall be authorized to cause the road to be placed in condition safe and fit for public travel and pay for cost out of the highway fund, reimbursing the fund by appropriate deduction from the next installment of weight and gasoline tax refunds due the county or counties.

224.18 State reward; map; conversion; determination; notice; official name; intercounty roads; abandonment; discontinuance of jurisdiction; petition; list of occupants on

abutting land; hearing; property as site of public access; determination as binding; easement; operation and maintenance of property; effect of noncompliance with subsection (12); reopening road ending; closure; initiation of proceedings.

Sec. 18. (1) If state reward is to be applied for, the board of county road commissioners shall file with the state transportation commission, for its approval, a map of the county showing the location of the proposed system of county roads. This proposed system may be changed if approved by the state transportation commission. All state rewarded roads composing a part of this system shall be taken over as county roads by the board of county road commissioners and any road or part of a road previously laid out shall become a county road if the board of county road commissioners shall at any time so determine, and in passing through or on the line between townships or villages or cities any streets or parts of streets may be adopted as a county road, with the consent of the proper authorities of that city or cities, village or villages. If a street is taken over and improved as a county road, city and village authorities may further improve the road by surfacing it outside the portion constructed by the county and by the addition of gutters, curbs, sidewalks, and other improvements, may provide for the care and maintenance of the improvements, and may levy and collect taxes for the improvements. The vote of the county road commissioners in respect to the determination shall be taken by yeas and nays, and shall be entered at large on the records of the board of county road commissioners. Notice of the determination shall be immediately given by the clerk to the highway authorities of each city or village in which the road or any part of the road is situated, and published in a newspaper of general circulation in the county, once in each week for 3 successive weeks. Proof of service and publication may be made by affidavit by any person knowing the facts and filed with the clerk. The affidavit or the record thereof or certified copy of the affidavit or record shall be prima facie evidence of its contents. After service and publication of the notice, the board of county road commissioners shall have exclusive jurisdiction and control of the road embraced within the determination, and the municipality within which the road is situated shall be relieved from all responsibility for the road. Immediately after laying out or taking control of a road the board shall give the road a name. The board may change the name of the road if it determines that a name change is necessary in order to conform to a general plan or avoid confusion or duplication. The name given by the board to any road under its jurisdiction, either originally or in case of a change as provided for in this section, is the official name by which the road shall be known.

(2) The board also may enter into agreements with the board of county road commissioners in any adjoining county with reference to the laying out, maintenance, construction, and improvement of inter-county roads. The decision of each board to become a party to an agreement is limited to the construction, improvement, or maintenance of the portion of the road subject to the jurisdiction of that board.

(3) The board of county road commissioners of any county that has adopted the county road system, at any time, may either relinquish jurisdiction of or absolutely abandon and discontinue any county road, or any part of a county road, by a resolution adopted by a majority vote. The vote of the county road commissioners in respect to either relinquishment of jurisdiction or absolute abandonment and discontinuance shall be taken and entered, and notice given, in the same manner as required in this section in cases in which county roads are adopted. After proceedings to relinquish jurisdiction have been had, the jurisdiction and control of the road, or part of the road, except as otherwise provided in this section, shall revert to the municipality within which the road is situated, and the county shall be relieved of the responsibility for the road. After proceedings to abandon absolutely and discontinue, the road or part of the road shall cease to exist as a public highway unless the unit of government that acquires the property or control of the property permits use as a public highway. Subject to subsection (8), the board, at the time of the passage of a resolution to abandon absolutely and discontinue any portion of a highway under its jurisdiction, shall determine in the resolution that it is in the best interests of the public that the highway or portion of the highway be absolutely abandoned and discontinued. The board shall cause a true copy of every resolution or other proceeding containing an accurate description of the lands comprising the highway or portion of the highway that has been absolutely abandoned and discontinued to be recorded in the office of the register of deeds for the county where the lands are situated.

(4) The board of county road commissioners shall not absolutely abandon and discontinue any highway, or part of a highway, except as provided in this section, upon the written petition of 7 or more freeholders of the township in which the road is sought to be absolutely abandoned and discontinued. The petition for absolutely abandoning and discontinuing a highway shall describe the road in general terms or by any name by which it is known, and if the absolute abandonment and discontinuance of only a portion of a road is asked for, that portion shall be specified. The petition shall be accompanied by a true and correct list of the names and mailing addresses of the occupants of each parcel of land abutting the highway, or portion of the highway, sought to be absolutely abandoned and discontinued, which list shall be certified to under oath by 1 of the

persons making or presenting the petition.

(5) If a petition for absolute abandonment and discontinuance of a road or portion of a road contains the signatures of all of the owners of record and occupants of land abutting the road, as ascertained from the records in the office of the register of deeds and the certified list provided for in subsection (4), the board of county road commissioners shall, within 20 days after receiving the petition, subject to subsection (8), determine the advisability of the abandonment and discontinuance and either grant or deny the petition without further proceedings. In all other cases the board shall, within 20 days after receiving a petition, issue a written notice stating the object of the petition and appointing a time and place of hearing, which notice shall be served on the township board of the township in which the road is situated and on the owners of record and occupants of lands through or adjoining which it is proposed to absolutely abandon and discontinue the road, by mailing a copy of the notice by first-class mail to the township board of the township in which the road is situated and to the residence of each owner of record or occupant at his or her last known address at least 30 days before the time of hearing. The township board of the township in which the road is situated shall have first priority to retain the property or portion of the property. The board shall also notify the township or municipality within which the road is situated, the state transportation department, and the department of natural resources if the action concerns any county road or portion of a county road that borders on, crosses, is adjacent to, or ends at a lake or the general course of a stream and the proposed action would result in the loss of public access. If the owner does not reside upon the land or the owner of record or occupant cannot be found within the county in which the land is situated, the notice to the owner of record or occupant of the land shall be served by posting in 3 public places in the township in which the road is situated, and by publication in a newspaper circulated within the county, 30 days before the time of hearing. Notice shall be served upon railroad companies by leaving a copy with the agent in charge of any ticket or freight office of the company operating the railroad, on the railroad line. The department of natural resources and the township or municipality within which the road is situated shall review the petition and determine within 30 days whether the property should be retained as an ingress and egress point. If the road is situated in a township, the township shall have first priority and the department of natural resources shall have second priority to retain the property as an ingress and egress point. If the road is not situated in a township, the department of natural resources shall have first priority to retain the property as an ingress and egress point.

(6) Upon the service of the notice required in subsection (5), and before any further proceedings are held, the person by whom the service was made shall make and annex to the notice, or a copy of the notice, an affidavit stating the time and manner of service, which shall be by first-class mail, and by posting and advertising. In addition, if service is upon a railroad company, the affidavit shall so state and shall specify the agent upon whom service was made. The notice and affidavit, together with an affidavit of publication if the notice was published, shall be attached to the petition, and the whole shall be present at the time of the hearing upon the petition. The board of county road commissioners may designate, as hearing examiner, an employee to hold the hearing upon the petition. After the hearing, the examiner shall report all findings of fact to the board.

(7) The board of county road commissioners or the superintendent or engineer employed by the board shall proceed to view the premises described in the petition and notice, and the board shall ascertain the necessity or advisability of absolutely abandoning and discontinuing the highway pursuant to the petition.

(8) Subject to subsection (5), if the board of county road commissioners determines pursuant to this section to relinquish control, discontinue, abandon, or vacate any county road or portion of a county road that borders on, crosses, is adjacent to, or ends at a lake or the general course of a stream and the township, if applicable, or the department of natural resources decides to maintain the road as a public access site, it shall convey by quitclaim deed or relinquish jurisdiction over the property if the interest is nontransferable to the township or the state. If the township obtains the property or jurisdiction over the property as an ingress and egress point and later proposes to transfer the property or jurisdiction over the property, it shall give the department of natural resources first priority to obtain the property or jurisdiction over the property. If the state obtains the property or jurisdiction over the property under this subsection, the property shall be under the jurisdiction of the department of natural resources. The state may retain title to the property, transfer title to a local unit of government, or deed the property to the adjacent property owners. If the state has purchased the property with restricted fund revenue, money obtained from sale of the property shall be returned to that restricted fund. The local unit of government shall either maintain the property as a site of public access or allow it to revert to the adjoining landowners.

(9) Subject to subsection (5), if the board of county road commissioners determines pursuant to this section to abandon any county road or portion of a county road to a township, it shall quitclaim deed the property if the interest is nontransferable to the township. The township shall either retain the property or allow it to revert to the adjoining landowners.

(10) Within 30 days after final determination upon the petition for absolutely abandoning and discontinuing a highway, the board of county road commissioners shall file with the state transportation commission a full record and return of its proceedings. A determination by the board of county road commissioners under this section is binding for purposes of 1927 PA 341, MCL 247.41 to 247.46.

(11) The board of county road commissioners may reserve an easement for public utility purposes within the right-of-way of any road absolutely abandoned and discontinued under this section and may, by resolution, extinguish any easement so reserved whenever the easement ceases to be used for public utility purposes.

(12) If interest in the property is conveyed or control over the property is relinquished to a local unit or this state under subsection (8), the local unit or this state, as applicable, shall operate and maintain the property so as to prevent and eliminate garbage and litter accumulation, unsanitary conditions, undue noise, and congestion as necessary.

(13) If a person shows substantial noncompliance with the requirements of subsection (12), the circuit court may order the local unit or this state to close the road ending in a manner to prevent ingress and egress to the body of water for a period of up to 30 days.

(14) If a person shows substantial noncompliance with the requirements of subsection (12) and the circuit court has previously closed the road ending for up to 30 days under subsection (13), the circuit court may order the local unit or this state to close the road ending in a manner to prevent ingress and egress to the body of water for 90 days.

(15) If a person shows substantial noncompliance with the requirements of subsection (12) and the circuit court has previously closed the road ending for 90 days under subsection (14), the circuit court may order the local unit or this state to close the road ending in a manner to prevent ingress and egress to the body of water for 180 days.

(16) If a person shows substantial noncompliance with the requirements of subsection (12) and the circuit court has previously closed the road ending for 180 days under subsection (15), the circuit court shall order the local unit or this state to show cause why the road ending should not be permanently closed in a manner to prevent ingress and egress to the body of water. Subject to subsection (17), the circuit court shall permanently close the road ending unless the local unit or this state shows cause why the road ending should not be closed.

(17) After a road ending is closed under subsection (16), and unless the property has been conveyed or relinquished to the adjacent landowners under subsection (18), the local unit or this state may petition the circuit court to reopen the road ending. The circuit court may order the road ending reopened if the local unit or this state presents a management plan to and posts a performance bond with the circuit court, and the circuit court finds that the management plan and performance bond are adequate to ensure compliance with subsection (12).

(18) After a road ending is closed by the circuit court under subsection (16), 1 or more of the adjacent landowners may petition the circuit court to order the local unit or this state to convey any interest in the property that the local unit or this state holds to the adjacent landowners, or, if the interest is nontransferable, to relinquish control over the property to the adjacent landowners.

(19) Proceedings under subsection (13), (14), (15), or (16) shall be initiated by application of 7 owners of record title of land in the local unit who own land within 1 mile of the road ending to the circuit court for the county in which the road ending is located. The applicants in the proceedings under subsection (13), (14), (15), (16), (17), or (18) shall give the persons described in subsection (5) notice of the application by registered mail.

224.19 Board of county road commissioners; powers and duties generally.

Sec. 19. (1) The board of county road commissioners may grade, drain, construct, gravel, shale, or

macadamize a road under its control, make an improvement in the road, and may extend and enlarge an improvement. The board may construct bridges and culverts on the line of the road, and repair and maintain roads, bridges, and culverts.

(2) The commissioners shall take over, construct, and maintain the bridges included in the proposed system of county roads provided in section 18 of this chapter, except bridges that are lawfully taken over for construction and maintenance in whole or in part by the state. When it is necessary to construct a bridge across a navigable stream over which a road under the control of the board of county road commissioners runs, the board may construct, repair, and maintain a bridge across the navigable stream with proper and adequate approaches to the bridge for the accommodation of traffic, and the bridge and the approaches to the bridge shall be of a width, size, strength, material, pattern, and design which the board considers suitable to meet the necessities and requirements of traffic and the relevant conditions, despite the fact that the bridge or the approaches to the bridge, or a portion of either, is within the limits of an incorporated municipality. The board of county road commissioners may borrow money, enter into contracts, and pledge the credit of the county in the manner and within the limitations provided by law for this purpose. For money borrowed, an obligation assumed, or a pledge of credit given, the bonds of the county may be issued and sold when authorized by the electors in the manner provided by law. The authority and powers granted in this section relative to bridges over navigable streams and the grant of that authority are retroactive and all acts of boards of county road commissioners, county boards of commissioners and other county officers, and all elections held, indebtedness incurred or authorized, and bonds approved or authorized by the electors of the county, to be issued and sold for the purpose and with the intent to provide for the construction, repair, and maintenance of bridges over navigable streams and their approaches are valid and binding acts and obligations. The obligations assumed, indebtedness incurred, pledge of credit given, and bonds issued or authorized by counties within this state for these purposes are valid.

(3) The construction, improvement, and maintenance of roads, bridges, and culverts, shall be in accordance with plans and specifications furnished or approved by the county highway engineer, who shall have supervision of the construction. The county road commissioners have all the authority in respect to the roads, bridges, and culverts which is vested in highway officers in townships, including the right to condemn gravel for road purposes and to petition the county drain commissioner for an outlet drain as provided in section 8 of chapter 15.

(4) The board of county road commissioners may maintain in its own name an action for injury to a county road, a part of the road as laid out and established, or to an improvement on the road. Money recovered in the action shall be paid to the county treasurer and shall be credited to the county road fund.

(5) When the board of county road commissioners decides to build or rebuild a road or bridge by a method other than by employment of day labor and purchase of necessary materials, the board shall advertise for sealed bids for the work, if the work involves an expenditure of an amount greater than \$20,000.00. The board may reject any and all bids and may do the work by day labor, purchasing the necessary materials and employing the necessary labor. If the board decides to do the work by day labor, the plans and specifications together with all bids received on the plans and specifications, and the reason, in writing, for not letting the job by contract, shall be filed in the office of the county clerk. If a bridge is to be repaired or built at a cost greater than \$500.00, the county road commissioners may apply to the state transportation department, which shall assign a competent engineer to review and report on plans that may have been prepared by the county highway engineer, or decide regarding the merits of each plan on which tenders may have been received before the contract was let, and pass on the completed structure before the contractor for that contract is paid.

224.19a Contract for maintenance of road surface; charges; payment of damages.

Sec. 19a. (1) As used in this section:

(a) “Board” means the governing body of a fair or exposition, which board is created under section 2 of Act No. 11 of the Public Acts of 1929, being section 46.152 of the Michigan Compiled Laws; section 4 of Act No. 80 of the Public Acts of 1855, as amended, being section 453.234 of the Michigan Compiled Laws; or Act No. 327 of the Public Acts of 1931, as amended, being sections 450.62 to 450.192 of the Michigan Compiled Laws.

(b) “Maintenance” means snow removal, grading, salting, controlling weed growth, or a related activity.

(c) "Road surface" means a highway, street, or other surface designed for and used primarily by, motor vehicles or fair events. Road surface includes parking lots, fair tracks, or similar area.

(2) A county road commission may contract with a board for the maintenance of a road surface. Before entering into a contract, the county road commission shall determine the charges to be made for maintenance, which charges shall be sufficient to completely reimburse the county road commission for all expenses incurred in the performance of the maintenance. The contract shall contain terms by which the board and not the county road commission shall be responsible for the payment of damages resulting from the maintenance of a road surface.

224.19b Working within right-of-way of county road; permit required; exceptions; permit requirements and schedule of fees; schedule of civil fines; itemization of costs; annual and emergency permits; security; certain conditions prohibited; limitation on permit fee; performance of routine maintenance or repair work; silvicultural operations; security bond or right-of-way bond; general liability insurance; right-of-way access; voluntary agreement; violation; civil fine; definitions.

Sec. 19b. (1) A person, partnership, association, corporation, or governmental entity shall not construct, operate, maintain, or remove a facility or perform any other work within the right-of-way of a county road, except sidewalk installation and repair, without first obtaining a permit from the county road commission having jurisdiction over the road and from the township, city, or village in which the county road is located when a permit is required by ordinance of the township, city, or village, under the authority conferred by section 29 of article VII of the state constitution of 1963. The adjacent property owner is not required to obtain a permit for work incidental to the maintenance of the right-of-way lying outside of the shoulder and roadway.

(2) A county road commission and a local unit of government may adopt, after a public hearing of which notice has been given by publication at least twice in a newspaper circulated in the county not more than 30 days nor less than 7 days before the hearing, reasonable permit requirements and, subject to subsections (6) and (7), a schedule of fees to be charged sufficient to cover only the necessary and actual costs applied in a reasonable manner for issuing the permit and for review of the proposed activity, inspection, and related expenses. In addition, a county road commission and a local unit of government may adopt a schedule of civil fines that can be imposed on a provider that performs work in a right-of-way without obtaining a permit as required under this section or that fails to maintain a security bond, right-of-way bond, or irrevocable letter of credit as required under this section during construction work within the right-of-way. The amount of a civil fine imposed on a provider must not exceed \$5,000.00 per violation, and a civil fine must not be imposed on a provider if the work is required in a right-of-way on an emergency basis to restore services impacting public safety. After the work authorized in the permit has been completed, itemization of all costs must be supplied upon request of the permit holder.

(3) When a road commission adopts procedures for issuing permits or adopts a schedule of fees as provided in this section, separate procedures and fee schedules must be adopted for issuing annual and emergency permits that reflect the minimal administrative burden of issuing an annual permit for frequent but routine and unobtrusive work such as surveying and the extraordinary emergency repairs to municipal or public utilities.

(4) A county road commission may not refuse a permit requested by a government entity for the installation of a facility or utility owned by that government entity if security is given by the permittee or its contractor to the county road commission sufficient to insure restoration of the road and appurtenances to the road and the adjacent right-of-way to a condition reasonably equal to or better than that existing before that installation.

(5) A county road commission shall not require a provider to perform or, except as otherwise provided in this section, pay for any topographic, boundary, environmental, or other kind of survey, study, or analysis of a right-of-way as a condition of or in connection with issuing a permit. A county road commission may require a provider to submit detailed engineering plans directly related to work in the right-of-way by that provider as a condition of or in connection with issuing a permit. In addition to any permit fees, a county road commission may require a provider to pay for any necessary and actual costs for inspections related to work in a right-of-way by that provider.

(6) A county road commission shall not charge a government entity or, except as otherwise provided in this section, a provider a permit fee exceeding \$300.00 per permit or, except as otherwise provided in this section,

\$1,000.00 total for all permit fees per project. In a county with a population of more than 250,000, a county road commission shall not charge a provider a permit fee exceeding \$600.00 per permit or, except as otherwise provided in this section, \$2,000.00 total for all permit fees per project.

(7) Except as otherwise provided in this section, a county road commission shall not require a provider to obtain a permit for performing routine maintenance or repair work, as defined in the permit, in a right-of-way more than once a year, and shall not charge a provider an annual permit fee exceeding \$300.00 for that permit for performing routine maintenance or repair work in a right-of-way. In a county with a population of more than 250,000, a county road commission shall not require a provider to obtain a permit for performing routine maintenance or repair work, as defined in the permit, in a right-of-way more than once a year, and shall not charge a provider an annual permit fee exceeding \$600.00 for that permit for performing routine maintenance or repair work in a right-of-way. The annual permit fee provided in this subsection is not included in the permit fee limitation provided in subsection (6).

(8) This section does not authorize a county road commission to require a permit for a driveway or routine maintenance in silvicultural operations that are otherwise permissible under the laws of this state. A county road commission shall not be held liable for the failure of a person performing work for which a permit is not required on a county road right-of-way to post a sign that gives advance warning of the work being performed in the right-of-way. As used in this subsection, "silvicultural operations" means silvicultural practices as that term is defined in section 51101 of the natural resources and environmental protection act, 1994 PA 451, MCL 324.51101.

(9) Except as otherwise provided in this section, a county road commission shall not require a provider to have more than 1 security bond or right-of-way bond to secure the performance of the conditions of all permits issued that authorize the provider to construct, operate, maintain, or remove a facility or perform any other work anywhere within the right-of-way, as designated in the permits, of any road under the jurisdiction of the county road commission. The provider shall determine whether the security bond or right-of-way bond described in this subsection is an insurance bond or a cash bond. A county road commission shall not require the security bond or right-of-way bond to be a cash bond. Except as otherwise provided in this section, the amount of a security bond or right-of-way bond described in this subsection must not exceed \$20,000.00. In a county with a population of more than 250,000, the amount of a security bond or right-of-way bond described in this subsection must not exceed \$40,000.00. Upon the request of a provider, the county road commission shall return a security bond or right-of-way bond to the provider within 120 days after the provider completes construction work in the right-of-way. Instead of providing a security bond or right-of-way bond, a provider may provide security that consists of an irrevocable letter of credit issued by a state or federally regulated financial institution licensed to do business in this state to secure the performance of the conditions of all permits issued that authorize the provider to construct, operate, maintain, or remove a facility or perform any other work anywhere within the right-of-way, as designated in the permits, of any road under the jurisdiction of the county road commission. Notwithstanding the limitation in this subsection requiring only 1 security bond or right-of-way bond, if there is a claim made against the bond, the provider must provide the county road commission with another security bond or right-of-way bond in order to continue working in that county. A bond required under this subsection must be from a state or federally regulated entity licensed to do business in this state.

(10) A provider shall maintain general liability insurance with minimum policy limits of \$2,000,000.00 per occurrence for property damage and \$2,000,000.00 per occurrence for bodily injury that apply to all claims, demands, suits, or causes of action arising in connection with or as a direct result of the provider's use and occupancy of a right-of-way under the jurisdiction of a county road commission.

(11) This section does not prohibit a county road commission and a provider from entering into a voluntary agreement regarding right-of-way access that includes permits, terms, and conditions that are different than the requirements or limitations imposed by this section, including, but not limited to, the amount of permit fees, terms of insurance, the size or number of security bonds or right-of-way bonds, or other valuable consideration. A county road commission that enters a voluntary agreement to access the rights-of-way with 1 provider shall offer similar terms and conditions regarding access to the rights-of-way to other providers.

224.19c Road project; conditions requiring competitive bidding; very low-volume local road project; requirements; definitions.

Sec. 19c. (1) Notwithstanding any provision of law to the contrary and subject to subsections (4) and (6), if a single township contributes 50% or more to the cost of a road project, the road project is located entirely within the jurisdiction of the township, and the road project does not disrupt any multiple township contract, the township board, by resolution, may require that the county road commission contract for the work on that road project through competitive bidding. A county road commission is not prohibited from submitting a competitive bid under this section.

(2) If a township board requires a county road commission to contract for work on a road project through competitive bidding as permitted under subsection (1), the county road commission shall use the responsive and reasonable best value bidder process to competitively bid and award the road project contract to a responsive and reasonable best value bidder. As used in this subsection, "responsive and reasonable best value bidder" means a bidder who meets 1 of the following:

(a) Complies with all bid specifications and requirements and is listed by the Michigan department of transportation as a qualified bidder for the particular type of road project involved.

(b) Complies with all bid specifications and requirements and is determined by the Michigan department of transportation or the county road commission to be responsible using all of the following criteria:

(i) The bidder's financial resources.

(ii) The bidder's technical capabilities.

(iii) The bidder's professional experience.

(iv) The bidder's past performance.

(v) The bidder's insurance and bonding capacity.

(3) If a township board requires a county road commission to contract for work on a road project through competitive bidding as permitted under subsection (1), the county road commission shall, within 15 days after the deadline for accepting bids, do all of the following:

(a) Based on the responsive and reasonable best value bidder process, determine which bids submitted are qualified and which bids submitted are not qualified.

(b) Clearly mark the bids, indicating which bids are qualified and which bids are not qualified.

(c) Transmit all of the bids received to the township board described in subsection (1) at least 30 days before awarding the contract to a qualified bidder.

(4) Subsections (1), (2), and (3) only apply to the following road projects:

(a) A road project involving unpaved roads with an estimated cost of more than \$25,000.00.

(b) A road project involving paved roads with an estimated cost of more than \$50,000.00.

(5) Notwithstanding any provision of law to the contrary and subject to subsection (10), if a single township contributes 50% or more to the cost of a very low-volume local road project, the road project is located entirely within the jurisdiction of the township, and the road project does not disrupt any multiple township contract, the work on that very low-volume local road project shall, at a minimum, comply with the standards adopted by the American Association of State Highway and Transportation Officials for very low-volume local road projects. A county road commission shall not impose construction and design standards on a very low-volume local road project that exceed the American Association of State Highway and Transportation Officials construction and design standards for very low-volume local road projects unless those standards are approved by the township board of a township described in this subsection. As used in this subsection, "very low-volume local road" means that term as defined by the American Association of State Highway and Transportation Officials in guidelines for geometric design of very low-volume local roads

(ADT≤400).

(6) Notwithstanding any provision of law to the contrary and subject to subsection (9), if 2 or more townships in combination with one another contribute 50% or more to the cost of a road project, the road project is located entirely within the jurisdiction of those townships, and the road project does not disrupt any multiple township contract, the township board of each of those townships, by resolution, may require that the county road commission contract for the work on that road project through competitive bidding. Competitive bidding by the county road commission is required on a road project described in this subsection only if each township board described in this subsection passes a resolution requiring that the work be awarded through competitive bidding. A county road commission is not prohibited from submitting a competitive bid under this section.

(7) If each township board requires a county road commission to contract for work on a road project through competitive bidding as permitted under subsection (6), the county road commission shall use the responsive and reasonable best value bidder process to competitively bid and award the road project contract to a responsive and reasonable best value bidder. As used in this subsection, "responsive and reasonable best value bidder" means a bidder who meets 1 of the following:

(a) Complies with all bid specifications and requirements and is listed by the Michigan department of transportation as a qualified bidder for the particular type of road project involved.

(b) Complies with all bid specifications and requirements and is determined by the Michigan department of transportation or the county road commission to be responsible using all of the following criteria:

(ii) The bidder's technical capabilities.

(iii) The bidder's professional experience.

(iv) The bidder's past performance.

(v) The bidder's insurance and bonding capacity.

(8) If each township board requires a county road commission to contract for work on a road project through competitive bidding as permitted under subsection (6), the county road commission shall, within 15 days after the deadline for accepting bids, do all of the following:

(a) Based on the responsive and reasonable best value bidder process, determine which bids submitted are qualified and which bids submitted are not qualified.

(b) Clearly mark the bids, indicating which bids are qualified and which bids are not qualified.

(c) Transmit all of the bids received to each township board described in subsection (6) at least 30 days before awarding the contract to a qualified bidder.

(9) Subsections (6), (7), and (8) only apply to the following road projects:

(a) A road project involving unpaved roads with an estimated cost of more than \$25,000.00.

(b) A road project involving paved roads with an estimated cost of more than \$50,000.00.

(10) Notwithstanding any provision of law to the contrary, if 2 or more townships in combination with one another contribute 50% or more to the cost of a very low-volume local road project, the road project is located entirely within the jurisdiction of those townships, and the road project does not disrupt any multiple township contract, the work on that very low-volume local road project shall, at a minimum, comply with the standards adopted by the American Association of State Highway and Transportation Officials for very low-volume local road projects. A county road commission shall not impose construction and design standards on a very low-volume local road project that exceed the American Association of State Highway and Transportation Officials construction and design standards for very low-volume local road projects unless those standards are approved by the township board of each township described in this subsection. As used in this subsection, "very low-volume local road" means that term as defined by the American Association of State Highway and Transportation Officials in guidelines for geometric design of very low-volume local roads (ADT≤400).

224.20 County road commissioners; surveys; tax, determination, maximum; submission to supervisors, revision, apportionment; tax levy, collection, disbursement.

Sec. 20. Before the first day of October of each year said board of county road commissioners shall cause preliminary surveys, general plans, specifications and estimates of roads, bridges and culverts to be made by the county highway engineer, whose qualifications shall be approved by the state highway commissioner in case it is intended by the commissioners to apply for said reward. Based upon the above estimates, said board of county road commissioners shall determine upon the amount of tax which in its judgment should be raised for such year in said county for the purposes aforesaid, specifying and itemizing the roads and parts of roads

upon which such moneys are to be expended, stating the amount asked for each of such roads, and shall cause such determination to be entered upon its records. Such tax shall not exceed five dollars on each one thousand dollars of assessed valuation according to the assessment roll of the last preceding year in counties where such valuation does not exceed twenty millions of dollars; such tax shall not exceed four dollars on each one thousand dollars of assessed valuation according to the assessment roll of the last preceding year in counties where such valuation is more than twenty million dollars and does not exceed forty millions of dollars; such tax shall not exceed three dollars on each one thousand dollars of assessed valuation according to the assessment roll of the last preceding year in counties where such valuation is more than forty million dollars and does not exceed one hundred million dollars; such tax shall not exceed two dollars on each one thousand dollars of assessed valuation according to the assessment roll of the last preceding year in counties where such valuation is more than one hundred million dollars and does not exceed three hundred million dollars; and such tax shall not exceed one dollar on each one thousand dollars of assessed valuation according to the assessment roll of the last preceding year in counties where such valuation is more than three hundred million dollars. At the annual meeting of the board of supervisors held in October, the county clerk shall lay such determination before the board of supervisors, and such board of supervisors shall pass upon the said determination, and if a majority of such board of supervisors agree therewith, then such tax shall be apportioned among the several townships and cities of said county according to their equalized valuation. If the determination of the board of county road commissioners shall not meet with the approval of a majority of the board of supervisors, then the said board of supervisors shall proceed to decide upon the amount of tax to be raised for such year in such county for the purposes aforesaid, and may allow or reject in whole or in part any or all of the items for the sections of roads thus submitted for its consideration; and it shall not be lawful for such county road commissioners without the consent of such board of supervisors to spend any such moneys upon any other roads than as thus specified. It shall be the duty of the board of supervisors to raise a sufficient tax to keep any county roads or bridges already built in reasonable repair, and in condition reasonably safe and fit for public travel. After the said board of supervisors shall have decided upon the amount of tax to be raised, the said board shall thereupon apportion such tax between the several townships and cities of said county according to their equalized valuation. The supervisors or other assessing officers in such townships and cities shall levy and apportion the taxes so apportioned as provided in this section, to their respective townships and cities respectively, upon which the county taxes are assessed. The taxes so assessed shall be collected and paid to the county treasurer the same as other county taxes. All the provisions of law relating to the assessment, levy, collection and return of county taxes and the sale of property delinquent therefor, shall apply to taxes to be raised pursuant to this act. The county treasurer shall keep a separate account of the taxes collected and moneys received under this act and shall pay the same out only upon the order of such board of county road commissioners and upon warrants signed by the chairman and countersigned by the clerk of the board. In counties having a county auditor or board of county auditors the warrants shall pass through the hands of such county auditors and be further countersigned by them, when payment shall be made thereof by the county treasurer. All moneys raised under the provisions of this act shall be expended by such board of county road commissioners exclusively for the purposes herein mentioned.

Public notice of the time, date, and place of the meeting shall be given in the manner required by Act No. 267 of the Public Acts of 1976. CHAPTER XV DRAINS

235.1 Drain in public highway; release of right-of-way, damages.

Sec. 1. Drains may be laid along and within the limits of or across any public highway: Provided, That when it is proposed to construct a drain in whole or in part along a public highway, the owners of the land abutting on the side of the highway along which such drain is proposed to be laid, shall be considered as still owning the fee of such land, and it shall be necessary for the county drain commissioner to obtain from them severally a release of their rights to so much of said highway as is necessary and proposed to be taken for the right of way of said drain, and for all damages on account thereof. In case such release is not executed within the time (a) prescribed in section 4 of chapter 3, such release (b) shall be obtained in the same manner as is provided in this act for obtaining private lands.

History: 1909, Act 283, Eff. Sept. 1, 1909;—CL 1915, 4510;—CL 1929, 4139;—CL 1948, 235.1.

Compiler's note: Section 4 of Chapter 3, referred to in this section, evidently derives from Act 254 of 1897, the provisions of which were superseded by Act 316 of 1923, which in turn was repealed by Act 247 of 1949, Act 40 of 1953, and Act 40 of 1956.

235.2 Drain in public highways; bridges and culverts; construction strength, apportionment and payment of cost, maintenance by property owner.

Sec. 2. When any drain crosses a highway, the necessary bridge or culvert shall be constructed on the center line of the highway as located by survey, and in accordance with plans and specifications which shall be approved by the county, township or district highway commissioner having jurisdiction, or by the state highway commissioner if such road is a trunk line road, and such bridge or culvert shall be of a permanent nature and of sufficient strength to safely carry a 15 ton moving load. The cost of constructing the necessary bridge or culvert shall be charged in the first instance as part of the cost of construction of such drain after which such bridge or culvert shall be maintained as a part of the highway: Provided, however, That if such highway is a trunk line road, or is a county road, the state highway commissioner, or the board of county road commissioners, as the case may be, may assume and bear such proportion of the cost as may be agreed on between the drain commissioner and state highway commissioner or board. In such case however the contract for the construction of the bridge shall not be let by the drain commissioner without the written consent of the state highway commissioner or the board of county road commissioners. Any such expense assumed by the state shall be met out of any funds appropriated for the state highway department that may be available therefor; and the proportion of the cost of any bridge to be borne by the board of county road commissioners shall be paid out of moneys in the county road fund not otherwise appropriated. When a drain passes along a highway, there shall be constructed at least 1 bridge or passageway across such drain connecting the highway with each enclosed field and with each farm entrance, which bridge or passageway shall also be charged in the first instance as a part of the construction of such drain, after which such bridge or passageway shall be maintained by the owner of the land.

235.3 Open drain in highways; consent of commissioner, location, disposition of earth.

Sec. 3. Before an open drain shall be laid along a public highway, the highway commissioner of the township in which the drain is located shall be consulted and his consent as to the proposed location of the drain shall be obtained in writing, stipulating that no excavation may be made nearer than 1 rod to the center line of the highway and stating what disposition shall be made of all material excavated. It shall be the duty of the drain commissioner to level down all materials placed in the roadway.

235.4 Open drain in highway; drain commissioner to apportion costs.

Sec. 4. The county drain commissioner shall apportion the per centum of the cost of construction of such drain which any township traversed or benefited thereby shall be liable to pay by reason of the benefit to the public health, convenience or welfare, or as the means of improving any highway, and he shall also apportion the per centum of benefits to accrue to any piece or parcel of land by reason of the construction of such drain, over and above the per centum assessed against such township as aforesaid, which per centum of benefits shall be apportioned upon and assessed against the lands benefited according to such assessment of benefits and which apportionments he shall announce at the time and place of letting, as provided in chapter 4. Such assessment of per centum for benefits shall thereupon be subject to review and correction, and may be appealed from in the manner hereinafter provided.

Compiler's note: The provisions of chapter 4, referred to in this section, evidently derive from Act 254 of 1897, which was superseded by Act 316 of 1923. Act 316 of 1923 was in turn repealed by Act 247 of 1949, Act 40 of 1953, and Act 40 of 1956. See now MCL 280.1 et seq.

235.5 Drain across adjacent land; acquisition of right-of-way, approval of board, deed.

Sec. 5. Whenever it is necessary or more convenient for the proper drainage of any highway in this state that the surplus water be taken onto or across the land adjacent thereto, the highway commissioner of the township in which said highway is situated, may secure the right of way and may open such drain or outlet for the water, and for these purposes may use any highway moneys of the township not otherwise appropriated, and such sums as may be voted for that use by the electors of the township. The highway commissioner shall secure the right of way for any such drain by gift or purchase from the owners of the land to be crossed by such drain; but in case of purchase the purchase price must be approved by the township board before any money be paid thereon. Such right of way shall be acquired by deed duly executed by the owner or owners of the lands sought to be crossed by the said drain, and shall be taken in the name of the township wherein the same is located, and filed in the office of the register of deeds of the county before any highway money shall be expended in opening such drain outside the highway limits.

Former law: See section 1 of Act 56 of 1903; and Act 23 of 1905.

235.6 Report to township electors; contents; highway drain fund, use of surplus.

Sec. 6. The highway commissioner shall report to the electors of the township at their annual meeting the amount of money expended by him during the year for such highway drainage, specifying the amount expended on each drain. He shall also recommend the raising of such sums as he may deem necessary for opening drains from the highway during the coming year, specifying each proposed drain and the probable amount needed for securing the right of way and opening the same. The money voted for this purpose by the electors of the township shall constitute a special highway drain fund, and shall be used for no other purpose. In case any money be left in the fund, after opening the drain for which it was raised, it may be used in opening any other highway drain in the township, or in cleaning out, when necessary, those already opened.

History: 1909, Act 283, Eff. Sept. 1, 1909;—CL 1915, 4515;—CL 1929, 4144;—CL 1948, 235.6.

Former law: See section 2 of Act 56 of 1903.

235.7 Report on construction; contents, filing; powers limited to highway drainage.

Sec. 7. On the completion by the highway commissioner of any drain constructed under the provisions of this act, it shall be the duty of said highway commissioner to file in the office of the county drain commissioner a detailed report of the construction of such drain, giving the date of construction, the termini and general course thereof, together with a copy of the deed by which the right of way therefor was secured. Nothing in the provisions of the preceding sections shall be construed as giving to highway commissioners power to lay out and construct drains having any other purpose than the drainage of highways.

235.8 Failure to secure right-of-way; application to drain commissioner, procedure; jurisdiction.

Sec. 8. In case the highway commissioner cannot secure the right of way across adjacent lands for the construction of any drain by agreement with the owner or owners of the land through which it will pass, he may make under his name of office an application to the drain commissioner of the county in which the proposed drain is situated, to lay out and establish the said drain. Such application shall conform to the law regulating applications for the construction of drains, and shall require no other signature than his own as highway commissioner. Such application shall have the same force and effect and be subject in other respects to the same laws and regulations that govern other applications for the establishment of drains, and shall confer jurisdiction and authority on the county drain commissioner to lay out and establish such drain under and by virtue and in pursuance of the law governing the location and establishment of other drains. It shall not be necessary to submit to the township board or boards of the township or townships crossed or affected by such drain the question of the necessity thereof or whether the same shall be conducive to health, convenience and welfare.
