Whereas, NPs provide health care to people of all ages and in diverse health care settings, such as private office practices, hospitals, long-term care facilities, schools, state and local health departments, managed care facilities, and retail-based clinics; and

Whereas, More than 18 percent of NPs practice in rural settings with populations of less than 25,000; and

Whereas, It is documented that patients of NPs are given more personal time and attention than they traditionally receive from other health care providers; now, therefore, be it
