House Bill 4506 (as passed by the House)
Sponsor: Representative Sue Allor
House Committee: Families, Children, and Seniors
Senate Committee: Families, Seniors and Human Services

Date Completed: 4-17-18

CONTENT

The bill would amend the Sexual Assault Victims' Medical Forensic Intervention and Treatment Act to require at least 80% of the money in the Sexual Assault Victims' Medical Forensic Intervention and Treatment Fund to be distributed to entities that perform required services (as currently provided) or demonstrate immediate capacity to perform those services, and allow entities to subcontract particular services.

The Act created the Fund and provides for the Domestic Violence Prevention and Treatment Board to spend money from it, as appropriated. At least 80% of the money must be distributed to entities that do all of the following:

- Perform the procedures required by sexual assault evidence kits.
- Provide specialized assistance to victims.
- Operate under the auspices of or in partnership with a local sexual assault crisis center.
- Comply with the standards of training and practice of the International Association of Forensic Nurse Examiners or a similar organization designated by the Board in consultation with the Department of Health and Human Services (DHHS).
- Provide access to medical forensic intervention and treatment services 24 hours a day.

Under the bill, not less than 80% of the money would have to be distributed to entities that do, or demonstrated immediate capacity to do, all of the following:

- Operate under the auspices of or in documented partnership with a local sexual assault crisis center.
- Provide specialized assistance to victims.
- Perform, or subcontract with another entity through an agreement approved by the Board to perform, the procedures required by sexual assault evidence kits in a manner that complies with the standards of training and practice of the International Association of Forensic Nurse Examiners or a similar organization designated by the Board in consultation with the DHHS.
- Provide, or subcontract with another entity through an agreement approved by the Board to provide, access to medical forensic intervention and treatment services 24 hours a day.

The Act also provides that not more than 15% of the money may be spent for medical forensic intervention-related training and technical assistance for staff members and for needs assessment. Not more than 10% may be spent for administrative costs incurred by the Board in implementing and administering the Act. The Board must distribute money by awarding

grants and contracts in a manner that reflects Michigan's population, geographic area, and rural and urban diversity using criteria the Board develops in consultation with the DHHS. The bill would retain those provisions.

The bill would take effect 90 days after enactment.

MCL 400.1535

Legislative Analyst: Nathan Leaman

FISCAL IMPACT

The bill would have an indeterminate negative fiscal impact on the State, and no fiscal impact on local units of government. By extending distributions to entities that demonstrated the capacity to fulfill the requirements of the Act, and to entities that subcontracted with others, the bill could lead to an increase in the Board's distributions from the Fund. Also, the Board could face a minor increase in administrative expenses from having to approve agreements between entities and subcontractors.
