Senate Bill 340 (Substitute S-1 as reported)
Sponsor: Senator Curtis S. VanderWall
Committee: Health Policy and Human Services

CONTENT

The bill would amend Part 117 (Pharmacy Practice and Drug Control) of the Public Health Code to do the following:

- Prohibit a parent company from operating a remote pharmacy unless each was located in Michigan and licensed as a pharmacy.
- Require the Department of Licensing and Regulatory Affairs (LARA) to grant a pharmacy license to an applicant seeking to operate a remote pharmacy if the applicant met certain requirements, including demonstrating that the proposed remote pharmacy would not be within 10 miles of another pharmacy.
- Authorize the Department to waive the 10-mile requirement if the applicant provided evidence that the proposed remote pharmacy would be located in an area where there was limited access to pharmacy services.
- Require a remote pharmacy not under the personal charge of a pharmacist to be staffed by a qualified pharmacy technician.
- Require the pharmacist in charge (PIC) of a parent pharmacy to serve as the PIC of the remote pharmacy.
- Require the PIC of a parent pharmacy to establish and maintain a written policy and procedural manual that contained certain information related to a remote pharmacy.
- Exempt a remote pharmacy from certain provisions related to the use of a qualified pharmacy technician's services.
- Require the PIC to display in a conspicuous location at the remote pharmacy a notice that provided certain information about the remote and parent pharmacy.
- Prohibit a remote pharmacy from dispensing more than 225 prescriptions per day.
- Modify certain provisions pertaining to a pharmacist's dispensing a drug to apply to a remote pharmacy.
- Specify that certain procedures pertaining to refilling a prescription would not apply to a parent pharmacy or a remote pharmacy under certain circumstances.

MCL 333.17707 et al.

Legislative Analyst: Tyler VanHuyse

FISCAL IMPACT

The bill likely would have a minor indeterminate fiscal impact on the Department of Licensing and Regulatory Affairs and no impact on local government. The bill would allow applicants to apply for and obtain a pharmacy license for the operation of a remote pharmacy. The revenue generated likely would cover the administrative and operational costs for those activities.
