

CLEAN AND RENEWABLE ENERGY AND ENERGY WASTE REDUCTION ACT (EXCERPT)
Act 295 of 2008

460.1003 Definitions; A to D.

Sec. 3.

As used in this act:

(a) "Applicable regional transmission organization" means a nonprofit, member-based organization governed by an independent board of directors that serves as the regional transmission organization approved by the Federal Energy Regulatory Commission with oversight responsibility for the region that includes the provider's service territory.

(b) "Biomass" means any organic matter that is not derived from fossil fuels, that can be converted to usable fuel for the production of energy, and that replenishes over a human, not a geological, time frame, including, but not limited to, all of the following:

(i) Agricultural crops and crop wastes.

(ii) Short-rotation energy crops.

(iii) Herbaceous plants.

(iv) Trees and wood, but only if derived from sustainably managed forests or procurement systems, as defined in section 261c of the management and budget act, 1984 PA 431, MCL 18.1261c.

(v) Paper and pulp products.

(vi) Precommercial wood thinning waste, brush, or yard waste.

(vii) Wood wastes and residues from the processing of wood products or paper.

(viii) Animal wastes.

(ix) Wastewater sludge or sewage.

(x) Aquatic plants.

(xi) Food production and processing waste.

(xii) Organic by-products from the production of biofuels.

(c) "Board" means the wind energy resource zone board created under section 143.

(d) "Carbon capture and storage" means a process that involves collecting carbon dioxide at its source and storing, or sequestering, it to prevent its release into the atmosphere.

(e) "Clean energy" means electricity or steam generated using a clean energy system.

(f) "Clean energy plan" means an electric provider's plan to meet the clean energy standard approved under section 51.

(g) "Clean energy portfolio" means the percentage of an electric provider's total retail electric sales consisting of clean energy or renewable energy.

(h) "Clean energy standard" means the clean energy portfolio required under section 51(1).

(i) "Clean energy system" means an electricity generation facility or system or set of electricity generation systems that meets any of the following requirements:

(i) Generates electricity or steam without emitting greenhouse gas, including nuclear generation.

(ii) Is fueled by natural gas and uses carbon capture and storage that is at least 90% effective in capturing and permanently storing carbon dioxide. If the department of environment, Great Lakes, and energy determines, through a facility-specific major source permitting analysis consistent with applicable United States Environmental Protection Agency rules, that a capture rate higher than 90% meets the best available control technology standard, as applicable, that higher percentage shall be used instead of 90% for facilities permitted after the effective date of the amendatory act that added section 51. Using carbon dioxide for enhanced oil recovery is not considered to be permanent storage for the purposes of this subparagraph.

(iii) Is an independently owned combined cycle power plant fueled by natural gas that has a power purchase agreement with an electric provider as of the effective date of the amendatory act that added this subparagraph and that by 2030 receives approval from the commission for a plan that achieves functional equivalence with the clean energy standard in section 51(1)(b) through reduction of greenhouse gas emissions using carbon capture and sequestration and other available applications, including, but not limited to, carbon removal technologies. In reviewing and approving a plan submitted under this subparagraph, the commission shall consider best available technology and applications as well as rate affordability, resource adequacy, and grid reliability.

(iv) Is defined as a clean energy system in rules adopted by the commission consistent with the purposes of this subdivision.

(j) "Commission" means the Michigan public service commission.

(k) "Customer meter" means an electric meter of a provider's retail customer. Customer meter does not include a municipal water pumping meter or additional meters at a single site that were installed specifically to support interruptible air conditioning, interruptible water heating, net metering, or time-of-day tariffs.

- (l) "Distributed generation" means the generation of electricity under the distributed generation program.
- (m) "Distributed generation program" means the program established by the commission under section 173.

History: 2008, Act 295, Imd. Eff. Oct. 6, 2008 ;-- Am. 2016, Act 342, Eff. Apr. 20, 2017 ;-- Am. 2023, Act 235, Eff. Feb. 27, 2024

Compiler's Notes: Enacting section 1 of Act 295 of 2008 provides: "Enacting section 1. As provided in section 5 of 1846 RS 1, MCL 8.5, this act is severable."
